Computer Science honors student at Drexel University with full-stack development, agentic AI and embedded systems experience across production and user-facing applications. Seeking software engineering internship to build impactful, scalable technologies.

Education

Drexel University Bachelor of Science in Computer Science, Minor in Business Analytics | Philadelphia, PA

Expected Graduation: June 2027

Universitat Pompeu Fabra Barcelona Program for Interdisciplinary Studies, Escola d'Enginyeria | Barcelona, Spain

January 2025 – March 2025

Skills

Programming Languages Python, C, C++, Java, C#, Makefile, JavaScript, TypeScript, Markdown, Assembly, R, Dockerfile

Tools & Frameworks VS Code, IntelliJ, PyCharm, Git, Node.js, Expo, AWS (ECS, S3, Lambda, Fargate, SQS, Bedrock), Firebase, Claude Code, MCP, PyTorch, Jupyter, Docker, Databricks

Spoken Languages Spanish

Work Experience

Cloud Developer Co-op Bristol Myers Squibb | Princeton, NJ

April 2026 – Present

- Transform 100+ BMS training materials into clearer, interactive content using Claude Code via custom MCP servers.
- Streamline AWS Fargate and ALB deployments across 75+ Cloud team projects with agentic workflows and GitHub Actions, cutting development time by 4 months.
- Build improved notification pipelines with Amazon SQS and SES to alert employees of critical CloudWatch events across 500+ AWS accounts on the BMS Multiverse Platform.
- Author whitepaper on implementing AWS MCP and AgentCore within BMS, outlining adoption strategies for more efficient agentic workflow orchestration

Software Development Engineering Co-op Epiq Solutions | Mount Airy, MD

April 2024 – September 2024

- Programmed JSON interfaces for software defined radios in Python, adhering to DevOps practices to improve code performance by 15%
- Built unified VITA49 packet parser libraries for 32-bit SDR architectures using Test Driven Development (TDD), improving production testing efficiency by 20%
- Designed Linux user interfaces in Python for test stations using PyQt and Matplotlib modules to streamline production testing procedures
- Tested 200+ digital, tuner and reference modules in SDRs for appropriate phase noise and power distribution, hitting quality assurance targets

Software Development Intern EV Buddy, Inc | Edison, NJ

June 2023 – September 2023

- Researched EV charging protocols (CCS, CHAdeMO) and developed technical specifications for vehicle-to-vehicle charging solution, informing prototype architecture
- Programmed sniffer data parsing software in C++ and Python to analyze EV charging protocols, improving success of prototype by 45%
- Used OpenEVSE Arduino embedded system to build a prototype architecture that interfaced with RS485 and CAN protocols used in EVs
- Designed UX flows (50+ Figma iterations) for a social app targeting EV owners to enable them to troubleshoot issues or provide assistance

Projects

Janata Chinmaya Mission | Remote

April 2025 – Present

Build a cross-platform social app (Expo, React Native, Cloudflare Workers) for Chinmaya Mission's youth wing using Claude Code-driven agentic workflows, helping members discover events, volunteer opportunities, and connect through community boards.

CrashMath College of Computing and Informatics | Philadelphia, PA

September 2022 – June 2023

Led development of a gamified calculus learning platform (Firebase, JavaScript, OpenAI API) that leverages intelligent tutoring chatbot to provide personalized problem-solving assistance.

Honors and Awards

A.J. Drexel Scholarship September 2022 – Present

Dean's List Recognition September 2022 – December 2022
